NANO SHIELD introduced to Sri Lanka by Inmark Eco Solutions

CHANNI BANDARA WILSON
NANO SHIELD is the perfect solution for ultraviolet (UV) and infrared (IR) rays that enter with the morning sunlight, and Inmark Eco Solutions (Pvt) Ltd. Managing Director Channi Bandara, at the opening ceremony held at Waters Edge, of the revolutionary solution known as NANO SHIELD which provides maximum protection from harmful radiation and heat.

NANO SHIELD introduced to Sri Lanka for the first time is a thermal insulative liquid coating solution for glass windows.

A window coated with NANO SHIELD blocks UV and IR rays while maintaining visible light transmission. Giving glass window to remain naturally white reducing heat.

NANO SHIELD blocks 99 percent UV rays and 65 percent of IR rays while maintaining 75 percent of visible light. It cuts down heat penetration through windows, reducing the need for air conditioning, saving money and up to 20 percent.

NANO SHIELD that blocks IR rays can be easily applied on existing glass surfaces that is the cost effective alternative to window tinting.

Inmark Eco Solutions (Pvt) Ltd website will launched by Visuvan Chandrasiri, Chairman/CEO, Hiral Arjuna with Inmark (Pvt) Ltd Managing Director Channi Bandara. Picture by Suresh Gunawardena

Distributor recruitment and training held on a monthly basis

Because they do support monthly for existing distributors and new distributors, the time it takes for a distributor to succeed in business is very short.

Coating training

Every month they hold a coating training for existing distributors and new distributors.

When we are invited and participate in the training session

Each distributor is ambitious and has asked a variety of things.

Currently there are 150 distributors throughout China

Every day it is coated in China. They are coating in various places such as condominiums, villas and hotels.
